 PROJECT SETUP

✓

Next.js 15 project initialised with App Router

✓

Tailwind CSS configured with custom brand tokens Navy (#1B4676), Accent amber (#F5A200), Navy-dark, Navy-light

✓

Font stack integrated — Lato, Montserrat, Playfair Display

✓

Global page-container utility class set up for consistent page width

✓

Base layout with Navbar and Footer scaffolded

✓

CSS variable --header-height wired up for dynamic navbar height

 NAVBAR

✓

Two-row desktop layout — logo + utility row (Row 1), nav links row (Row 2)

✓

Scroll-collapse behaviour — Row 1 hides with AnimatePresence on scroll past 100px

✓

Logo slides into Row 2 when scrolled using Framer Motion

✓

Transparent mode on homepage — neutral black gradient overlay, white logo shown

✓

Coloured logo shown after scrolling or on inner pages

✓

"My BI Paints" link turns white on transparent hero to avoid amber-on-amber clash

✓

Mega menu with clip-path curtain animation and promo strip

✓

Mobile hamburger menu with accordion dropdown for sub-links

✓

Breakpoint changed from lg (1024px) to xl (1280px) — hamburger now shows at 1024px

**HERO SECTION**

- ✓ Full-viewport hero with Ken Burns slow zoom (scale 1 → 1.06, 9s loop)
- ✓ Hero image updated to cinematic paint roller + industrial bokeh + city line-art image
- ✓ Blue tint removed — section background and gradient overlay changed from navy to neutral black
- ✓ Image focal point set to `objectPosition: 65% center` for warm right side
- ✓ Bottom row: description card (left) + "Our Products" CTA card (right)
- ✓ Double-padding bug fixed — removed redundant px-6 wrapper that stacked on page-container
- ✓ GradualSpacing headline animation — letter-by-letter slide-in

**BUSINESS AREAS SECTION**

- ✓ Animated stats row — 300K+, 50+, 10 Years
- ✓ CountUpStat (number count-up) replaced with GradualSpacing — character-by-character slide-in animation
- ✓ Amber "+" suffix kept separately alongside GradualSpacing number
- ✓ Full-bleed cinematic banner added below stats using the new hero image
- ✓ White fade gradient at banner bottom blends into the next section

|  TRUSTED PROJECTS / WORK CAROUSEL |
|--------------------------------------------------------------------------------------------------------------------|
| ✓ Original 3-card carousel built with dynamic card-width measurement                                               |
| ✓ Arrow style updated — removed circle border, plain amber line arrows                                             |
| ✓ Rebuilt as MotionFlow-style carousel — one full-bleed card at a time                                             |
| ✓ Spring transitions matching MotionFlow spec (damping: 40, stiffness: 200)                                        |
| ✓ Auto-play every 1.5 seconds with leftward slide direction                                                        |
| ✓ Left / right arrow controls with border hover effect                                                             |
| ✓ Progress pills — active pill expands to 28px amber, inactive dots 8px grey                                       |
| ✓ Project info overlay — badge, client name, sector, location on gradient                                          |

|  FOOTER                      |
|---------------------------------------------------------------------------------------------------------------|
| ✓ Redesigned to Jotun-style — white background, clean 3-column layout                                         |
| ✓ Newsletter strip above footer — name, email, industry dropdown, consent checkbox, amber subscribe button    |
| ✓ Column 1: Logo + company description + quick links                                                          |
| ✓ Column 2: Main nav links with arrow icons and dividers                                                      |
| ✓ Column 3: "Get in touch" CTA + social icons                                                                 |
| ✓ Inline SVG social icons (Facebook, LinkedIn, Instagram) — brand icons not in installed lucide-react version |
| ✓ Copyright bar with policy links                                                                             |

GLOBAL & RESPONSIVE FIXES

- ✓ `page-container` padding made responsive — 1rem (mobile) → 1.5rem (sm) → 3rem (lg+)
- ✓ `--header-height` CSS variable switches correctly at xl breakpoint
- ✓ Scroll handler dynamically updates header height variable on scroll
- ✓ Marquee animation keyframes added for scrolling logo/client strips

**Stack:** Next.js 15 · TypeScript · Tailwind CSS · Framer Motion · Lucide React · next/image | **Branch:** header-UI-change | **Reported:** July 2026
